

# Learning and action alliances for Nexus environments in an uncertain future LENSES

This project is part of the PRIMA programme supported by the European Union

### **LENSES**

### Learning and action alliances for Nexus environments in an uncertain future

# LENSES Overview, approach and main goals

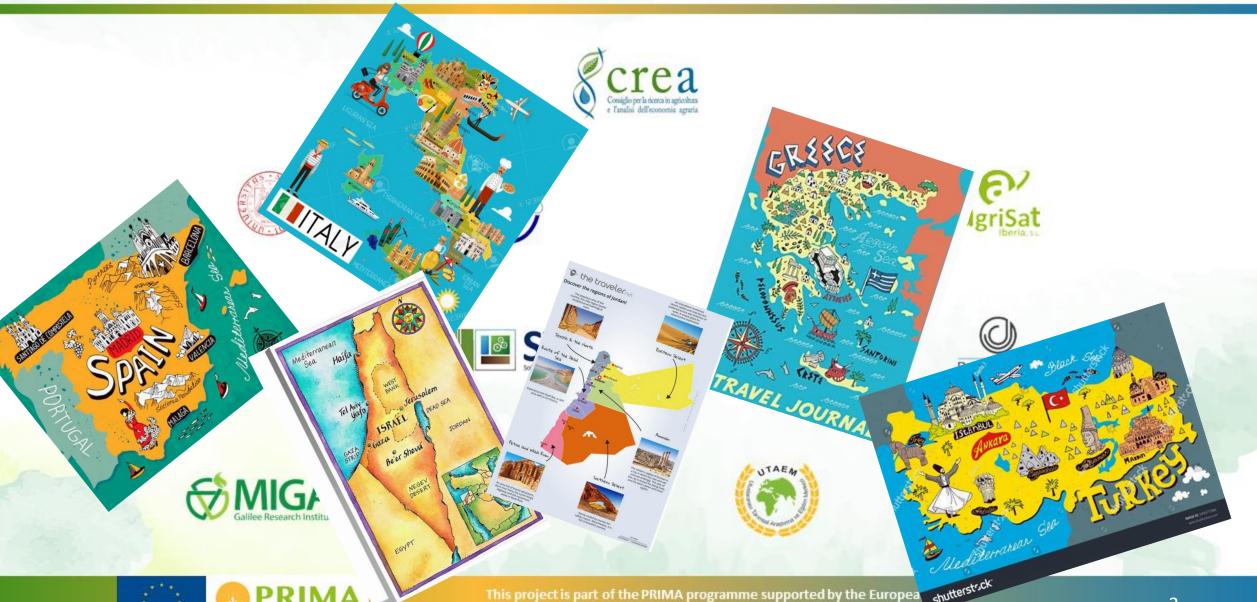

**Stefano Fabiani** 

GAn° [2041] [LENSES] [Call 2020 Section 1 Nexus IA]

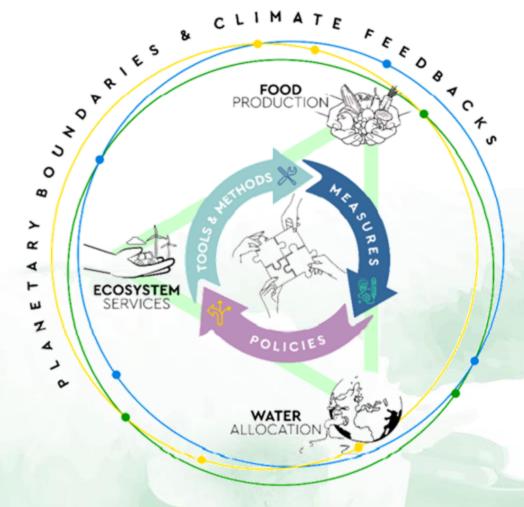

Resilient WEF Nexus systems is only possible through the true engagement of all relevant parties in the policy-dialogue and decision-making processes across the domains while incorporating uncertainty!

LENSES will use **LAA** and **PSDMs** in a multi-scalar WEF Nexus analysis to:

- i. Improve the **understanding of the interlinkages** between the different sectors of WEF Nexus and of how actions in one sector create consequences in the other sectors;
- ii. Support a socio-economic, policy and environment-related scenario analysis;
- iii. Help in the co-designing and building of systemic and innovative **resilience-enhancing solutions** (such as NBS), capable to support system transition towards sustainable development and SDG delivery;
- iv. Enhance trust between stakeholders and awareness of the complexity of the systems under investigation.

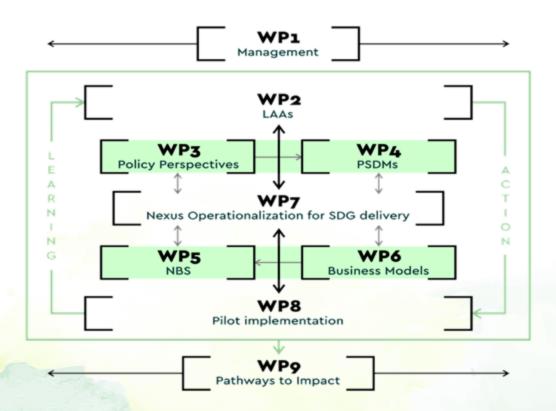

### **Structure of work plan**

Middle Jordan Valley (JO) Galilee, Hula Valley (Israel) Guadalquvir basin, Doñana national park area (Spain)

Tarquinia plain (IT) Gediz Basin & Delta\_(Turkey) International Long-Term Ecological Research Network Sites (GR)

- Different **conflicting water and land uses** (food production through agricultural activities, forest and natural ecosystems conservation and other activities (e.g. tourism, industrial production, etc.).
- Typical Mediterranean conditions, in terms of e.g. climate conditions and climate change impacts, interaction between surface water (SW) and groundwater (GW), potentially conflicting uses of the resources, relevance of agricultural activities, types of crops, social context and stakeholders.

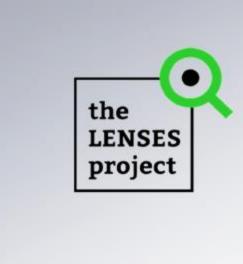

## **Innovation potential and impact**

# 1. ...from Nexus Thinking to Nexus Doing;

- 2. Development of an operational approach to the **interdependent management** of Water-Ecosystems-Food resources (Mediterranean region conditions);
- 3. Replicability of the demonstration cases also after the project's end;
- 4. Creating strong **cross-sectoral links** between institutions including ground-level beneficiaries and relevant public authorities that govern the Nexus approach;
- 5. Strengthen scientific capacities and set-up a **collaborative WEF Nexus space** across the Mediterranean region.

Thank you for your attention!
